Systems Science and Decision Making in Public Health

There are research opportunities for post-graduate researchers (post-docs and research associates), visiting research assistants (graduate and local undergraduate students), and visiting professors at Harvard Medical School and Massachusetts General Hospital.

Qualifications include a strong research portfolio and evidence of publications in the intersection of public health/health policy AND systems science/decision making. The primary area of interest is the opioid crisis. Mental health (PTSD) and obesity are other areas of interest.

Priority goes to motivated and organized individuals, committed to doing impactful research, with excellent writing and communication skills as well as great attention to details.

Candidates will work with Dr. Jalali\(^1\) in a collaborative, productive, and friendly research team, writing scientific articles and research proposals. These opportunities do not include admissions to any graduate programs.

Visit [https://scholar.harvard.edu/jalali/opportunities](https://scholar.harvard.edu/jalali/opportunities) for more information.
