

MIT (IC)³
INTERDISCIPLINARY
CONSORTIUM
for IMPROVING
CRITICAL
INFRASTRUCTURE
CYBERSECURITY

Interested in Cybersecurity? We Want You!

Thesis, Research Assistant, or UROP opportunities available now

The Interdisciplinary Consortium for Improving Critical Infrastructure Cybersecurity, (IC)³, is headquartered in the MIT Sloan School of Management. In collaboration with other parts of MIT, (IC)³ is addressing the important need to improve the cybersecurity of critical infrastructure through an interdisciplinary research approach focused on **the strategic, managerial, and operational issues related to cybersecurity**. (IC)³ brings together thought leaders from industry and government with MIT faculty, researchers, and students, conducting research in multiple relevant areas. There are many opportunities for you to get involved in our leading-edge research. The figure below shows (IC)³'s current major project areas.

Are you interested in cybersecurity? Do you want to be part of exciting and ground-breaking research? Have excellent research, reading, writing, and communication skills? If so, then we encourage you to join us. Familiarity with cybersecurity is a plus but not required.

We are particularly interested in working with motivated and organized students who are committed to doing research. Selected candidate(s) can join our projects immediately. Please email Dr. Mohammad Jalali (jalali@mit.edu) with your cover letter and CV. Please contact us with any questions. Visit our website, ic3sloan.mit.edu, for more information about our activities and our research.
